Job Opportunity (assistant professor) in the Department of Physiology and Cell Biology, Tokyo Medical and Dental University

A position for an assistant professor is available in the Department of Physiology and Cell Biology, Tokyo Medical and Dental University. The aims of the studies are to elucidate molecular mechanisms of organ-crosstalk between bone and other tissues, especially central nervous system. Our approaches include cell culture, virus vector-mediated gene transfer, flow cytometry, Western blot analysis, and novel and established mouse genetic models. Highly motivated applicants should have research experience in cell biology, molecular biology, signal transduction or animal experiments.

Applicants should have good skills for written and oral communication as well as those for giving lectures to medical and dental school students. Applicants should possess an MD and/or PhD degree. Salary will be commensurate with experience and based on the Tokyo Medical and Dental University guidelines. We encourage applications from women, who are currently under-represented in the University.

Applicants should submit by the end of March 2016 curriculum vitae, statement of research interests, and the names of three potential references electronically to Prof. Shu Takeda (tmd.phy2@gmail.com). Please visit our lab website at http://www.bone-organcrosstalk-tmdu.jp/ for more details on our research.

Shu Takeda M.D., Ph.D.
Professor and Chair
Department of Physiology and Cell Biology
Graduate School of Medicine and Dentistry
Tokyo Medical and Dental University
