

Job offer for Assistant Professor Position
Institute of Research, Tokyo Medical and Dental University (TMDU)

The Center for Stem Cell and Regenerative Medicine, a research center belonging to the Institute of Research, Tokyo Medical and Dental University (TMDU), has been working in research and development for clinical applications with mesenchymal stem cells since it was established in April, 2013. As an organization playing a central role in the “Organ and Tissue Neogenesis Consortium,” which represents one of the most critical fields of research at TMDU, we will further promote the next generation of research and development for clinical applications and continue to create advanced regenerative medicine in collaboration with domestic and international research institutes and companies. We are now engaged in recruitment of a young researcher with high research competencies in a regeneration of gastrointestinal tract; who has a flexible mindset and an international perspective; and who is highly motivated to take on new challenges to create novel regenerative medicine as a part of his or her own research going forward.

1. Position, Affiliation

Assistant Professor, Center for Stem Cell and Regenerative Medicine, Institute of Research, TMDU

2. Research Field

Applied research concerning regenerative medicine in a field of gastrointestinal tract.

3. Terms and Conditions of Employment

Full-time position with a three-year contract, renewable based on evaluation of research activities.

Salary will be paid and determined by TMDU annual salary system

***TMDU supports women scientists conducting research and encourages them to apply for this position.**
