

Oral and Maxillofacial Surgery

1. Staffs and Students (April, 2009)

Professor	Ken OMURA	
Junior Associate Professor	Hiroyuki HARADA,	Yusuke NAKAJIMA
Tokunin Junior Associate Professor	Daisuke ITO	
Assistant Professor	Minoru IKUTA, Yuji KABASAWA, Eriko MARUKAWA, Masaru SATO	Keiichi MORITA, Hiroaki SHIMAMOTO, Hidetaka MIYAZAKI,
Graduate Student	Chanwit PRAPINJUMRUNE, Atsushi UESUGI, Kanako MATSUMOTO, Kiyoshi SATO, Mitsuhiko YOSHIMOTO, Yasuyuki SHIMADA, Sho MATSUKAWA, Shinsuke YAMAMOTO,	Yasuko HANABATA, Kenji INOMATA, Takuma KUGIMOTO, Yukinobu TAKAHASHI, Toshimitsu OSAKO, Ichiro HATAKEYAMA, Takahide TAGUCHI, Yukiko TAKAHASHI

2. Purpose of Education

The program is designed for acquiring the broad knowledge and basic skills of oral and maxillofacial surgery, mainly concerning the diagnostic procedure, treatment technique and the perioperative patient care. Also throughout the professional education, we promote the system in which each graduate student can select his or her special field in the full scope of oral and maxillofacial surgery in the future.

3. Research Subjects

- 1) Development of multidisciplinary treatment of oral cancer.
- 2) Clinical study on sentinel node navigation surgery for oral cancer.
- 3) Study on molecular markers for lymph node metastasis of oral cancer.
- 4) Clinical study on early detection of oral cancer by mouth washing.
- 5) Clinical study on skeletal and dental changes after distraction osteogenesis in patients with cleft lip and palate.
- 6) Clinical study on maxillomandibular skeletal and dental changes after orthognathic surgery.
- 7) Study on neurosensory disturbances using the heat flux technique.
- 8) Clinical study on pre-surgical nasoalveolar molding in patients with cleft lip and palate.
- 9) Clinical study on alveolar bone grafting with segmental osteotomy.
- 10) Multidisciplinary treatment of temporomandibular disorders.
- 11) Clinical and experimental studies on bone regeneration using β -TCP and/or platelet rich plasma.
- 12) Development of multidisciplinary treatment of oral mucosal diseases.

4. Clinical Services

The Oral and Maxillofacial Surgery Clinic examines yearly more than 5000 new patients with various diseases arising in oral and maxillofacial regions. The clinic has diplomat of the Japanese Society of Oral and Maxillofacial Surgeons and accepts many referrals from dentists and medical doctors. We provide a full range of services including extractions, removal of wisdom teeth and management of facial trauma, jawbone defect, facial deformity, temporomandibular joint disease, cleft lip and palate, oral mucosal disease, and benign and malignant tumors. The special outpatient clinics are organized by the specialists to offer the best service, especially for patients with malignant tumor, temporomandibular joint disease, cleft lip and palate, facial deformity and oral mucosal disease which need high degree of specialty and long term follow up. We also prepare some groups for inpatients with an emphasis on specialties, to provide the recent and advanced treatment.
