Removable Partial Denture Prosthodontics

1. Staffs and Students (April, 2010)

Professor  Yoshimasa IGARASHI
Associate Professor  Noriyuki WAKABAYASHI
Junior Associate Professor  Masayuki HIDESHIMA, Kenji FUEKI
Assistant Professor  Masayuki SATO, Takeshi UENO, Ichirou MINAMI, Teruyasu NAKAMURA, Jyurou WADACHI, Shusuke INUKAI, Eiko YOSHIDA
Hospital Staff  Tomohiro ANDO, Masahiro ONA, Takeyoshi SUGIURA, Mika INUKAI, Kensuke KAGAYA
Secretary  Haruka MATSUURA
Graduate Student  Kouta OKANO, Yuka ABE, Kazuki ISHIHATA, Yoshiyuki SAKAI, Jyunichirou WADA, Kousuke UMEHARA, Aiichirou AO, Yuuki IWAKI, Kengo FUJIKI, Keita YODA, Kazuhito SHOI, Atsushi TAKAICHI, Natsuko MURAKAMI, Yusuke TOYOSHIMA, Ryo HAYASHI, Takashi SEKINISHI

2. Purpose of Education

Removable partial denture prosthodontics is a branch of Oral Health Science that deals with replacement of missing teeth and oral tissues to restore and maintain oral form, function, appearance, and health. Main objective of removable partial denture prosthodontics is to provide students in the graduate course opportunity to master standard method of diagnosis, technical skill, applied skill in lectures and practical works. Students are also taught on how to adapt removable prosthesis in the mouth with missing teeth from a biological and engineering standpoints.

3. Research Subjects

1) Comparisons between a mixing ability test and masticatory performance tests using a brittle or an elastic test food.
2) Assessment of the Pronunciation in Subjects with Sound Dentition.
3) Follow-up study and risk assessments for periodontitis of abutment teeth in patients with removable partial dentures.
4) Assessment of psychological stress during dental treatments.
5) Application of polyester copolymer to denture material.
6) Application of cobalt chrome alloy to telescopic denture material.
7) Three-dimensional analysis of occlusal curvature.
8) Fabrication of precision metal frameworks with cast-on method.

4. Clinical Services

Patients with missing teeth have increased according to the aging of the population, so improving their quality of life has been required. Dental prosthetic clinic provides removable partial dentures to patients with missing teeth as one of the best treatment options. The dentures are individually designed from the view points such as mobility of denture, oral sense, pronunciation and aesthetic points of view.
