

## 第56回グローバルCOE海外研究者講演会

### 歯と骨の分子疾患科学の国際教育研究拠点 ーデント・メドミクスのインテリジェンスハブー

講師: **Prof Tae-Geon KWON**

Professor, Dept. of Oral & Maxillofacial Surgery,  
School of Dentistry, Kyungpook National University

日時: 2012年10月18日(木) 17:00~18:00

場所: 歯科棟南4階 特別講堂

### 演題: **Considerations for accurate and predictable surgical correction of facial asymmetry**

There are various presurgical and intraoperative considering factors related with successful correction of dentofacial deformity. Especially, we first need to understand characteristics of the dentofacial asymmetry and craniofacial asymmetry. The accurate diagnosis of 3D hard and soft tissue pattern and realization of planned surgical movement to operation theatre can ensure the optimal treatment result.
