

Essential Expertise for Clinical Dentistry 2

This course offers you up-to-date dental clinical knowledge and techniques that are often publicized in journals or books. Four experts in the fields of Gerodontology, Periodontology, Prosthodontics, and Cariology & Operative Dentistry will provide case study lectures and hands-on sessions.

This course aims at not only 1) updating participants' dental clinical knowledge (case study lectures) but also 2) developing and brushing up clinical techniques (hands-on sessions). You will have the chance to actually engage in discussions with your peers and join hands-on clinical focused sessions.

Overview

- The course will run over approximately 4-6 months. You can join two case study lectures and two hands-on sessions.
- There will be one session per month and each session is 60-120 minutes.

In this course, you will:

- Learn dental clinical knowledge through interactive lectures and discussion.
- Practice clinical techniques and skills in the hands-on sessions.

After this course, you will be able to:

- Have dental clinical knowledge and new approaches for future treatments.
- Consider your clinical cases from a critical perspective.
- Use skills for clinical procedures.

Textbook (none)

Instructor will provide the written materials, if any.

Note

- Maximum enrollment for this course is 30 (participants).
- Only those who have dental or medical licensure can join this course.
- A certificate of completion will be given to those who attend every assigned session.
- For hands-on sessions, you can join two from below. Enrollment capacity is limited to 15 participants, half that of the case study lectures. Please order your selections from 1 (most desired) to 4 (least desired). Kindly keep in mind, that because of enrollment limitation, there may be cases where we cannot accept your first request.
