

Essential Expertise for Clinical Dentistry 3 Summer Intensive Course 2017

This course offers you up-to-date dental clinical knowledge and techniques that are often publicized in journals or books. Six experts in the fields of Implantology, Endodontics, Gerodontology, Periodontology, Prosthodontics, and Cariology & Operative Dentistry will provide case study lectures and hands-on sessions. This course aims at not only 1) updating participants' dental clinical knowledge (lectures) but also 2) developing and brushing up clinical techniques (hands-on sessions). You will have the chance to actually engage in discussions with your peers and join hands-on clinical focused sessions.

Overview

- You can join lectures and one hands-on session.
- Each session is 75-120 minutes.

In this course, you will:

- Learn dental clinical knowledge through interactive lectures and discussion.
- Practice clinical techniques and skills in the hands-on sessions.

After this course, you will be able to:

- Have dental clinical knowledge and new approaches for future treatments.
- Consider your clinical cases from a critical perspective.
- Use skills for clinical procedures.

Textbook (none)

Instructor will provide the written materials, if any.

Note

- Maximum enrollment for this course is 45 (participants).
- Only those who graduated from dental school can join this course.
- A certificate of completion will be given to those who attend every assigned session.
- For hands-on sessions, you can join one from below. Enrollment capacity is limited to 15 participants. Please order your selections from 1 (most desired) to 3 (least desired). Kindly keep in mind, that because of enrollment limitation, there may be cases where we cannot accept your first request.
