

# Essential Expertise for Clinical Dentistry 6

## Summer Intensive Course 2020

This course offers you up-to-date dental clinical knowledge and techniques that are often publicized in journals or books. Experts in various fields will provide lectures and discussion sessions.

This course aims updating participants' dental knowledge (lectures) and developing and brushing up clinical techniques. You will have the chance to actually engage in discussions with the lecturers via online!

### Overview

- You should join all assigned sessions.
- Each session consists of on-demand, video learning + discussion (Q&A) with the lecturers via Zoom meeting.

### In this course, you will:

- Learn dental knowledge through lectures and interactive discussion.

### After this course, you will be able to:

- Have new dental knowledge and new approaches for future treatments.
- Consider your clinical cases from a critical perspective.

### Textbook (none)

Instructor will provide the written materials, if any.

### Note

- Maximum enrollment for this course is 50. (Priority to those who have never taken this course)
- Only those who have graduated from a dental school can join this course.
- A certificate of completion will be given to those who attend every assigned session.

### Please note:

Before the discussion, please self-study with the on-demand video lecture.

Details will be informed via email to those who participate.

### Online discussion: 18:00-18:30 via Zoom meeting
