

International Student Exchange Event-Spring 2023

On Wednesday, May 17th, 2023, the International Student Exchange Event-Spring was held at Ueno Park to promote international and Japanese student exchanges between Tokyo Medical and Dental University and Juntendo University. The day was hot and sunny, and a total of about 80 students from both universities attended.

At the beginning of the event, Professor OKITA of Juntendo University explained the history of Ueno Park, and then the students were divided into small groups and explored the park with chatting each other. After the one-and-a-half-hour free walk the students seemed more relaxed and friendly with each other than before the walk.

We would like to thank Juntendo University, the organizer of this event, for preparing the event, including the handouts for the participants.
