

98th AOCS Annual Meeting & Expo

A Joint World Congress with the Japan Oil Chemists' Society

May 13–16, 2007 • Québec City Convention Centre • Québec City, QC, Canada

Monday May 14, 8:00 am – 12:00 pm

H&N 1: Metabolic Syndrome: Lipoprotein Metabolism and Dietary Influences

Chair(s):

*M. Okazaki, Tokyo Medical & Dental University, Japan;
and P.J. Huth, Dairy Management Inc., USA*

Introduction

M.Okazaki, Laboratory of Chemistry, College of Liberal Arts and Sciences, Tokyo Medical and Dental University

Insulin Resistance and Postprandial Hyperlipidemia.

M. Ai, Lipid Metabolism Laboratory, Human Nutrition Research Center on Aging, Tufts University, USA

Biogenesis of HDL by the Apolipoprotein/ABCA1 Pathway.

S. Yokoyama, Nagoya City University Graduate School of Medical Sciences, Japan.

Limiting Dietary Carbohydrate But Not Saturated Fat Improves the Atherogenic Dyslipidemia of Metabolic Syndrome.

R. Krauss, Children's Hospital Oakland Research Institute, Oakland, CA, USA
