

Molecular Cytogenetics

1. Staffs and Students (April, 2009)

Professor	Johji Inazawa M.D., Ph.D.
Associate Professor	Issei Imoto M.D., Ph.D.
Associate Professor	Ken-ichi Kozaki D.D.S., Ph.D.
MTT Lecturer	Takeshi Matsui Ph.D.
Assistant Professor	Jun Inoue Ph.D.
Assistant Professor	Shin Hayashi M.D., Ph.D.
Research Assistant	Ayako Takahashi, Rumi Mori
Secretary	Yoriko Fukukawa, Yuko Shinozaki
Graduate Student	Shozo Honda, Bai Hua,
	Tomoki Muramatsu, Mayuko Furuta,
	Itsumi Ohmori, Masato Kawahara,
	Junya Kobayashi, Makoto Maeda
Research Student	Ryoko Kikuchi, Shuhei Komatsu,
	Tomohiko Tsuruta

2. Purpose of Education

The principal aim of Department of Molecular Cytogenetics is to understand the molecular mechanism underlying intractable diseases, such as cancer and uncharacterized genetic diseases. Main objective of Department of Molecular Cytogenetics in the graduate course is to provide students opportunity to study molecular cytogenetic approach for intractable diseases, identify genes responsible for those diseases, and develop innovative techniques/ practically useful tools for detection of genomic and epigenomic aberrations in those diseases. It is our goal to bridge the gap between basic and clinical research for the benefit of each of the patients.

3. Research Subjects

1. Identification of genes responsible for intractable diseases including cancer and genomic disorders through integrative genomics and epigenomics
2. Development of innovative techniques for genomics and epigenomics in medical science
3. Development of practically useful tools for molecular diagnosis of intractable diseases
4. Molecular mechanisms involved in stratified epithelial differentiation and cancer progression

4. Publications
