

大学院特別講義

医歯学先端研究特論

Special Lecture of Advanced Medical and Dental Study

(生命理工学先端研究特論) (医歯理工学先端研究特論)

The material science behind cements and newly developed materials

The ever-expanding technology of dental materials fueled by technological innovation. For example, dental cement has improved from luting material to adhesive material with innovation of adhesive technology. The background of research and technology for new products of GC will be introduced in this lecture.

Dr. Futoshi Fusejima

Deputy General Manager
Research & Development Department
GC Corporation
