医歯学先端研究特論

Special Lecture of Advanced Medical and Dental Study

(生命理工学先端研究特論) (医歯理工学先端研究特論)

Technological Design of Dental Materials

The dental adhesives have been dramatically improved in last 25 years. They contribute not only the minimal invasive dental treatment but also the esthetic restorations. The historical review and the basic knowledge of the adhesive materials will be discussed in this lecture. Also, the information of the new materials will be introduced.
