下記により大学院特別講義を行いますので多数ご来聴下さい。

記

本講義は、英語による講義です

演題: What Dr. Angle wanted to entrust his passion of the ORTHODONTIA to his followers

講師: 中島 栄一郎 先生

中島矯正歯科クリニック 院長

日時: 第1回 平成26年 6月30日(月) 17時00分～18時30分

第2回 平成26年 7月28日(月) 17時00分～18時30分

場所: 7号館【歯学部校舎棟】 2階 第2講義室 (両日とも)

講演要旨:

1 What is the real meaning of Angle CL I?

Dr. Angle said that “The Upper First Permanent Molar as a basis of Diagnosis”. Why do you think Dr. Angle thought the upper first molars were important in treatment planning? I think that Dr. Angle emphasis on the importance of the first molars is not only it's shape, sizes, caries risks but also it's functional role in the treatment. So, Angle CL I is not only the relationships between upper and lower first molars, but also the position of the upper molars in the skull.

2 Proprioceptive Neuromuscular Facilitation

PNF is one of the tools that we can apply in daily dental treatment for this purpose. I have been using this therapy for 15 years.

Proprioceptive; Having to do with any of the sensory receptors that give information concerning movement and position of the body.

Neuromuscular; Involving the nerves and muscles

Facilitation; Making easier
