3. Course Purpose and Outline

Course Purpose

The Bioscience Program offers lectures on several important topics in Molecular Biology, Genetics, Epigenetics, Bioinformatics, Developmental Biology and Engineering, Cell Biology and Biochemisty. The major purpose of the program is to obtain the latest information on these fields of science and to train scientific mind as well as logical thinking skills necessary to become independent researchers.

Outline

Molecular mechanisms on several fundamental biological phenomena related to embryonic development, cell differentiation and immune system are introduced and several human diseases due to breakdown of normal regulation, such as genomic imprinting diseases, cancers, immunodeficiency and allergy, will be discussed.

4. Course Objective(s)

Understand useful and critical information from basic to the latest biological sciences and medicine.

5. Lecture Style

Lecture by the lecturer, discussion with students, and writing reports.

6. Grading System

Attendance to lectures (80 %) and reports (20 %) are evaluated.

7. Exam eligibility

More than 75% of attendance to the lectures

8. Prerequisite Reading

Instruct at first lecture if necessary.
