

## ANNUAL PUBLICATIONS

## 1st Department of Orthodontics

1993.1.-2000.3.

## I. Staffs and Students (April, 1999)

|                         |   |
|-------------------------|---|
| Professor               | K. Soma   |
| Associate Professor     | J. Iida   |
| Lecturer                | T. Ishida   |
| Research Associate      | H. Warita   |
|                         | M. Hisano   |
|                         | Y. Matsumoto  |
| Dental Resident         | M. Hase   |
|                         | H. Yamasawa   |
|                         | S. Furuta   |
|                         | Z. Kanno  |
|                         | A. Oka  |
| Technical Staff         | S. Katoh  |
| Administrative Staff    | T. Nakamura   |
| Graduate Student        | T. Magara   |
|                         | S. Kaneko   |
|                         | K. Amemiya  |
|                         | Y. Seki   |
|                         | N. Matsubara  |
|                         | P. Santiwong  |
|                         | S. Yomoda   |

|                         | H. Watarai  |
|                         | M. Esashika   |
|                         | S. Sringkarnboriboon                                    |
|                         | J. Zeredo   |
| Dental Research Student | H. Miura  |
|                         | J. Iino   |
|                         | K. Sakamoto   |
|                         | M. Niino  |
|                         | J. Shimada  |
|                         | S. Kuroda   |
|                         | K. Kasai  |
|                         | K. Hioki  |
|                         | J. Ando   |
|                         | P. Cholasueksa  |
|                         | K. Iramaneerat  |
|                         | C. R. Chung   |
|                         | M. Ohe  |
|                         | H. Sasaki   |
|                         | T. Takigawa   |
| Affiliate Dentist       | T. Shimokawa (Research Associate of Functional Anatomy) |
| Clinical Training Staff | T. Fujimori   |
|                         | S. Narita   |

## II. Educational Outline of Graduate Course

The main subjects of this department are as follows.

To conduct researches on normal growth, development and function of teeth, periodontal tissues, maxillofacial configuration and the associated muscular soft tissues and to study the etiology, improvement and prevention of malocclusion and morphological abnormality derived from disharmony of the above structures. As for postgraduate education, during the 3-year course for research students or the 4-year course for graduate students, we aim at training clinicians or researchers who profoundly learn special knowledge and required technique of orthodontics in our postgraduate curricula.

### III. Research Subjects

- (1) Biomechanical study of occlusion
- (2) Studies on biological response and functional adaptation followed by orthodontic stimulation
- (3) Studies on changes with aging concerning dento-maxillo-craniofacial morphology and function
- (4) Studies on interrelation between cranio-maxillofacial complex and whole body
- (5) Development of mechanics and materials for orthodontic treatment

### IV. Publications (January, 1993-March, 2000)

#### A. Original Articles
