II. Educational Outline of Graduate Course

The main subjects of our education for graduate students are as follows:

- 1 . Basic concept for maxillofacial orthognathics
- 2 . Pre and postnatal craniofacial growth and development
- 3 . Diagnosis and treatment planning for craniofacial dysmorphology
- 4 . Maxillofacial reconstruction and function

III. Research Subjects**Clinical Research**

- 1 . Morphology and physiology of craniofacial complex in patients with birth defects and also in patients with developmental anomalies.
- 2 . Morphological evaluation by using 3-D analyzing system.
- 3 . Development of new orthodontic appliance for patients with birth defects.

4. Methodology of diagnosis on birth defects.

Basic Research

1. Control mechanism of tongue posture and mandibular posture.
2. Biochemical analysis on scar tissue.
3. Orthodontic tooth movement in scar tissue.
4. Histogenesis on condylar cartilage in prenatal mice.
5. Animal models for congenital anomalies.

IV. Publications (January, 1993-March, 2000)
