

ANNUAL PUBLICATIONS

Department of Comprehensive Oral Health Care Behavioral Dentistry

1999.4.-2000.3.

I. Staffs and Students (April, 1999)

Professor	S.Mataki
Research Associate	I.Igarashi
Graduate Student	K.Kondo
	N.Yoshida

II. Educational Outline of Graduate Course

Behavioral dentistry and behavioral sciences should be taught with careful integration so that the subject matter assumes its proper relevance to the care of the patient. The subjects concerned are principally psychology, sociology, communication skills, epidemiology, and ethics and the law. Application of behavioral sciences to dental education is also an important subject.

III. Research Subjects

- 1) Study on an organization of behavioral dentistry in dental education program.
- 2) Study on an application of behavioral sciences to a curriculum development in dental education program

IV. Publications (January, 1993-March, 2000)
