## 第632回難研セミナー

## 第 208 回 難治疾患共同研究拠点セミナー

下記により難研セミナーを開催しますので、多数御来聴下さい。

記

日 時: 2023年 7月 13日(木) 17:00 ~ 18:00

場 所: MD タワー22 階 共用セミナー室 4

inflammation

演 者: 永田 雅大 先生 ( CECAD Research Center, University of Cologne )

演 題:Function of pore forming proteins in caspase—8-mediated cell death and

要旨: Apoptosis is classically seen as a non-inflammatory type of cell death. However, a number of studies showed that caspase—8-mediated apoptosis could trigger severe inflammation in different tissues, challenging the concept that apoptosis is a non-inflammatory cell death process. Recent studies implicated activation of pore-forming protein gasdermin E (GSDME) by caspase—3 and GSDMD by caspase—8 as a mechanism that impacts on caspase—dependent cell death and influences its immunostimulatory properties. Here we assessed the role of GSDME and GSDMD in caspase—8-mediated inflammation in relevant mouse models and the results of these in vivo studies will be presented.

連絡先: 難治疾患研究所 医化学分野 瀬川勝盛 (内線 4906)

共 催: 難治疾患研究所 機能分子病態学分野 松田憲之
