

Job Opportunity: Assistant Professor in Department of Cellular Dynamics (tentative)

Due to the merger with Tokyo Institute of Technology, scheduled for October 2024, working conditions and affiliations, etc., at the new university may be subject to change.

Medical Research Institute (MRI) of Tokyo Medical and Dental University (TMDU) invites applications for a faculty position (Assistant Professor) in the field of Cellular Dynamics (tentative).

1. Position

Assistant Professor

2. Areas of Research

The research aims of the Department of Cellular Dynamics are to understand the diversity of cells in multicellular organisms, with the goal of controlling their dynamics to establish therapies and prevent intractable diseases. Currently, we focus on cellular dynamics during cancer development and embryogenesis, aiming to uncover mechanisms that determine the fate of individual cells, as well as intercellular communications that affect the fate of cell populations. In this recruitment, we are seeking researchers who have expertise in cutting-edge technologies for analyzing cellular dynamics in cancer and developmental biology. They should be capable of conducting individual analyses using mouse models and omics approaches. Additionally, these researchers should have the ability to independently plan and conduct research projects and possess sufficient capability to educate graduate and undergraduate students.

3. Terms and Conditions of Employment

The contract of Full-time position will start from October 1, 2024 and will not exceed five years period, renewable based on an evaluation according to the rules and regulations of TMDU once.
