Course by the instructor with practical experiences					
All classes are taught in English.					
Lecture place					
Building #7 3/5floor pre-clinical training rooms					
Course Purpose and Outline					
This course offers you up-to-date dental clinical knowledge and techniques that are often publicized in journals or books. Experts in various fields will provide hands-on sessions.					
This course aims at not only 1) updating participants’ dental knowledge but also 2) developing and brushing up clinical techniques. You will have the chance to actually engage in discussions with your peers and join hands-on clinical focused sessions.					
Course Objective(s)					
In this course, you will:					
▪ Learn dental knowledge through interactive lectures and discussion.					
▪ Practice clinical techniques and skills in the hands-on sessions.					
After this course, you will be able to:					
▪ Have dental knowledge and new approaches for future treatments.					
▪ Consider your clinical cases from a critical perspective.					
▪ Use skills for clinical procedures.
