Our Vision

For healthcare professionals, continuing education is essential for keeping abreast of advances in science and technology, new discoveries, and providing high-level education. TMDU provides continuous learning opportunities necessary throughout a dentist's career to update the dental skills, knowledge and current educational methodologies that TMDU provides, which indispensable for improving oral healthcare provision and education.

TMDU Frontrunners

TMDU provides the top class education in the areas of dentistry in which Japan excels. Dental education worldwide is in need of such knowledge, and to have the opportunity to learn up-to-date information from forerunners in the field will be very beneficial. TMDU frontrunners are also the leading researchers and educators in their field and provide health care and education based on the newest evidence and their research outcomes. We are pleased to share some techniques including the educational methodologies we use.

Continuous Learning in TMDU

TMDU is proactive to the needs of overseas learners, and educating global healthcare professionals and top-level researchers in the areas of research, education and patient care is one of our missions. Our university has accepted the largest number of international dental graduate students in Japan for many years now. As dental education must evolve accordingly, TMDU provides continuous opportunities for dental professionals.

International Faculty Development Course (IFDC)

This course offers an opportunity to learn up-to-date dental expertise including current educational methods through lectures/case-based studies and discussion sessions to improve professional competitiveness in the global community.
