

Job Opportunity: Assistant Professor in Department of Developmental and Regenerative Biology

Medical Research Institute (MRI) of Tokyo Medical and Dental University (TMDU) invites applications for a faculty position (Assistant Professor) in the field of Medical Chemistry.

1. Position

Assistant Professor

2. Areas of Research

Our goal is to define the molecular basis for the mechanism of organ formation, regeneration, and maintenance using knockout mice and mutant fish. To accomplish this goal, we have focused on defining signaling molecules and pathways that regulate liver and brain formation and maintenance. Our study will provide new insights into understanding the precise molecular mechanisms that underlie organ failures found in human diseases and will lead to the development of new rational therapy for the diseases. In this recruitment, we seek a researcher who has a passion to clarify these mechanisms with a strong background in cell biology using mice and human iPS cells.

3. Terms and Conditions of Employment

Full-time position with a contract, which will start April 1, 2022, not exceeding third years period. Renewable based on evaluation according to the rules and regulations of TMDU, but not exceeding March 31, 2027. No further renewal possible.

Salary will be determined by the annual salary system outlined by TMDU regulations.

Female applicants are strongly encouraged to apply for this position, as TMDU promotes gender-equality work environment. We provide career support programs for all staff that enable them to balance work and life, such as childbirth and child rearing.
