

第546回 難研セミナー

第119回 難治疾患共同研究拠点セミナー

下記により難研セミナーを開催しますので、多数御来聴下さい。

記

日 時： 2016年 2月 8日（月） 15:00 ～ 16:30

場 所： 難治疾患研究所 22階セミナー室

演 者： Dr. Gurvinder KAUR (Senior Research Scientist, Dept. Transplant Immunology & Immunogenetics, All India Institute of Medical Sciences)

演 題： Genomic susceptibility to HIV-1 and progression to AIDS in Asian Indian

要 旨：

There is inconsistency in vulnerability to HIV-1 infection, its transmission and rate of disease progression to AIDS. Several host genes have been identified that regulate innate and adaptive immune responses against the virus in relation to diverse human populations and viral clades. An insight into the population specific correlates of protection is necessary for developing screening tests that could identify people at higher or lower risk of infection and rate of disease progression, design and predict vaccine responsiveness and understand immunopathogenic mechanisms.
