

定方 哲史 (Tetsushi Sadakata)

〔原著〕

1. Sadakata T, Sekine Y, Oka M, Itakura M, Takahashi M, & *Furuichi T. Calcium-dependent activator protein for secretion 2 (CAPS2) interacts with the class II ARF small GTPases and regulates dense-core vesicle trafficking. *FEBS Journal.* (in press)
2. Hamatake M, Miyazaki N, Sudo K, Matsuda M, Sadakata T, Furuya A, Ichisaka S, Hata Y, Nakagawa C, Nagata K, Furuichi T, & *Katoh-Semba R. Phase advance of the light-dark cycle perturbs diurnal rhythms of brain-derived neurotrophic factor and neurotrophin-3 levels, which reduces synaptophysin-positive presynaptic terminals in the cortex of juvenile rats. *Journal of Biological Chemistry.* **286**, 21478-21487 (2011).
3. *Furuichi T, Shiraishi-Yamaguchi Y, Sato A, Sadakata T, Huang J, Shinoda Y, Hayashi K, Mishima Y, Tomomura M, & Yoshikawa F. Systematizing and cloning of genes involved in the cerebellar cortex circuit development. *Neurochemical Research.* **36**, 1241-1252 (2011).
4. Shinoda Y, Sadakata T, Nakao K, Katoh-Semba R, Kinameri E, Furuya A, Yanagawa Y, Hirase H, & *Furuichi T. Calcium-dependent activator protein for secretion 2 (CAPS2) promotes BDNF secretion and is critical for the development of GABAergic interneuron network. *Proceedings of the National Academy of Sciences.* **108**, 373-378 (2011).
