

公募班員 星野 幹雄 (Mikio Hoshino)

1) 成果のリスト

Nishimura YV, Shikanai M, Hoshino M, Ohshima T, Nabeshima Y, Mizutani K, Nagata K, Nakajima K, Kawauchi T: Cdk5 and its substrates, DCX and p27-kip1, regulate cytoplasmic dilation formation and nuclear elongation in migrating neurons. *Development*, 141 (18): 3540-3550, 2014. doi: 10.1242/dev.111294.

Ito H, Shiwaku H, Yoshida C, Homma H, Luo H, Chen X, Musante L, Fischer U, Frints SGM, Romano C, Ikeuchi Y, Shimamura T, Imoto S, Miyano S, Kawauchi T, Hoshino M, Sudol M, Arumughan A, Wanker EE, Rich T, Schwartz C, Matsuzaki F, Bonni A, Kalscheuer VM, Okazawa H: In utero gene therapy rescues microcephaly caused by Pqbp1-hypofunction in neural stem progenitor cells. *Molecular Psychiatry*, in press.

De Luca A, Parmigiani E, Tosatto G, Martire S, Hoshino M, Buffo A, Leto K, Rossi F: Exogenous Sonic Hedgehog modulates the pool of GABAergic interneurons during cerebellar development. *Cerebellum*, 14 (2): 72-85, 2014. doi: 10.1007/s12311-014-0596-x.

Hori K, Nagai T, Shan W, Sakamoto A, Taya S, Hashimoto R, Hayashi T, Abe M, Yamazaki M, Nakao K, Nishioka T, Sakimura K, Yamada K, Kaibuchi K, Hoshino M: Cytoskeletal regulation of AUTS2 in neuronal migration and neuritogenesis. *Cell Reports*, 9 (6): 2166-2179, 2014. doi: 10.1016/j.celrep.2014.11.045.

Wright MC, Reed-Geaghan EG, Bolock AM, Fujiyama T, Hoshino M, Maricich SM: Unipotent Atoh1+ progenitors maintain the Merkel cell population in embryonic and adult mice. *J Cell Biol*, 208 (3): 367-379, 2015. doi: 10.1083/jcb.201407101.
