Scope of “6th International Symposium on Nanomedicine (ISNM2012)”

The combination of top-down and bottom-up nanotechnologies started a real revolution in science & technology. Medical treatment is one of the interesting fields where we will find important applications of this new technology. As a result, we can expect these new technologies to be used to develop novel devices or methods for treatment of cancer, neurodegenerative diseases and many other intractable diseases.

The aims of this symposium are (1) to provide a platform on which to discuss the future prospects for these science-technologies and construct an international human network in the fields of Nano-Bio-Medicine and (2) to incubate excellent young generation researchers in these fields utilizing this network. Concerning these aims, we especially consider the importance of Asian network, and invite several speakers in the relating fields from these countries. The key words of the symposium are cancer, molecular imaging, drug delivery, regenerative medicine, neurodegenerative disease and other nanomedicine topics.

The 6th symposium is arranged by Shimane University (Prof. Yasuhisa Fujita) as a chair university. And also the special session, “Latest Prospect for ALS”, is arranged by Japan Nanomedicine Society (Prof. Tsuneo Urisu).

Registration

Send the information; Family name and Given name, Title, Affiliation, Address, Zip code, Tel, Fax, E-mail to Ms Yumiko Kinoshita (ksanso@r2.dion.ne.jp) by e-mail, or register at the conference site.

Please pay the Registration fee at the conf. site.

Standard members : 30,000 yen.
Standard nonmembers: 30,000 yen
Student : 3,000 yen
